DETAILED ACTION

Election/Restrictions

1. This application contains claim 3, drawn to an invention nonelected without traverse in Paper No. 5. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1, 2 and 4-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Machida et al. for reasons cited in the previous Office action.

Response to Arguments

4. Applicant's arguments filed 8/5/02 have been fully considered but they are not persuasive.

5. Regarding applicant's argument that Machida et al. concerns developers for **use** in electrostatic photography, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in

Art Unit: 1713

order to patentably distinguish the claimed invention from the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

6. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., anti-clogging characteristics) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

7. In any regard, the primary criteria for selecting the pigments and resin particles to "substantially prevent clogging", according to applicant description (see page 6, ¶ 1 of spec), is that the pigments and resin particles share the same polarity, such as in the developing/recording liquid of Machida et al. (see col. 2, lines 15-25).

Thus, the requirements for rejection are met and the rejections are sustained.

8. Regarding claims 4-16, in applicant's REMARKS, applicant argues that claims 4-10 are allowable because of their dependence on independent claim 1 and that claims 11-16 are allowable because of their independence on dependent claim 2 (both presumed to embody the novelty of their dependent claims). However, as stated above, neither of claim 1 or 2 are allowable.

Art Unit: 1713

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Kelechi C. Egwim whose telephone number is (703) 306-5701. The examiner can normally be reached on M-T (7:30-6:00).
